JINYOUNG

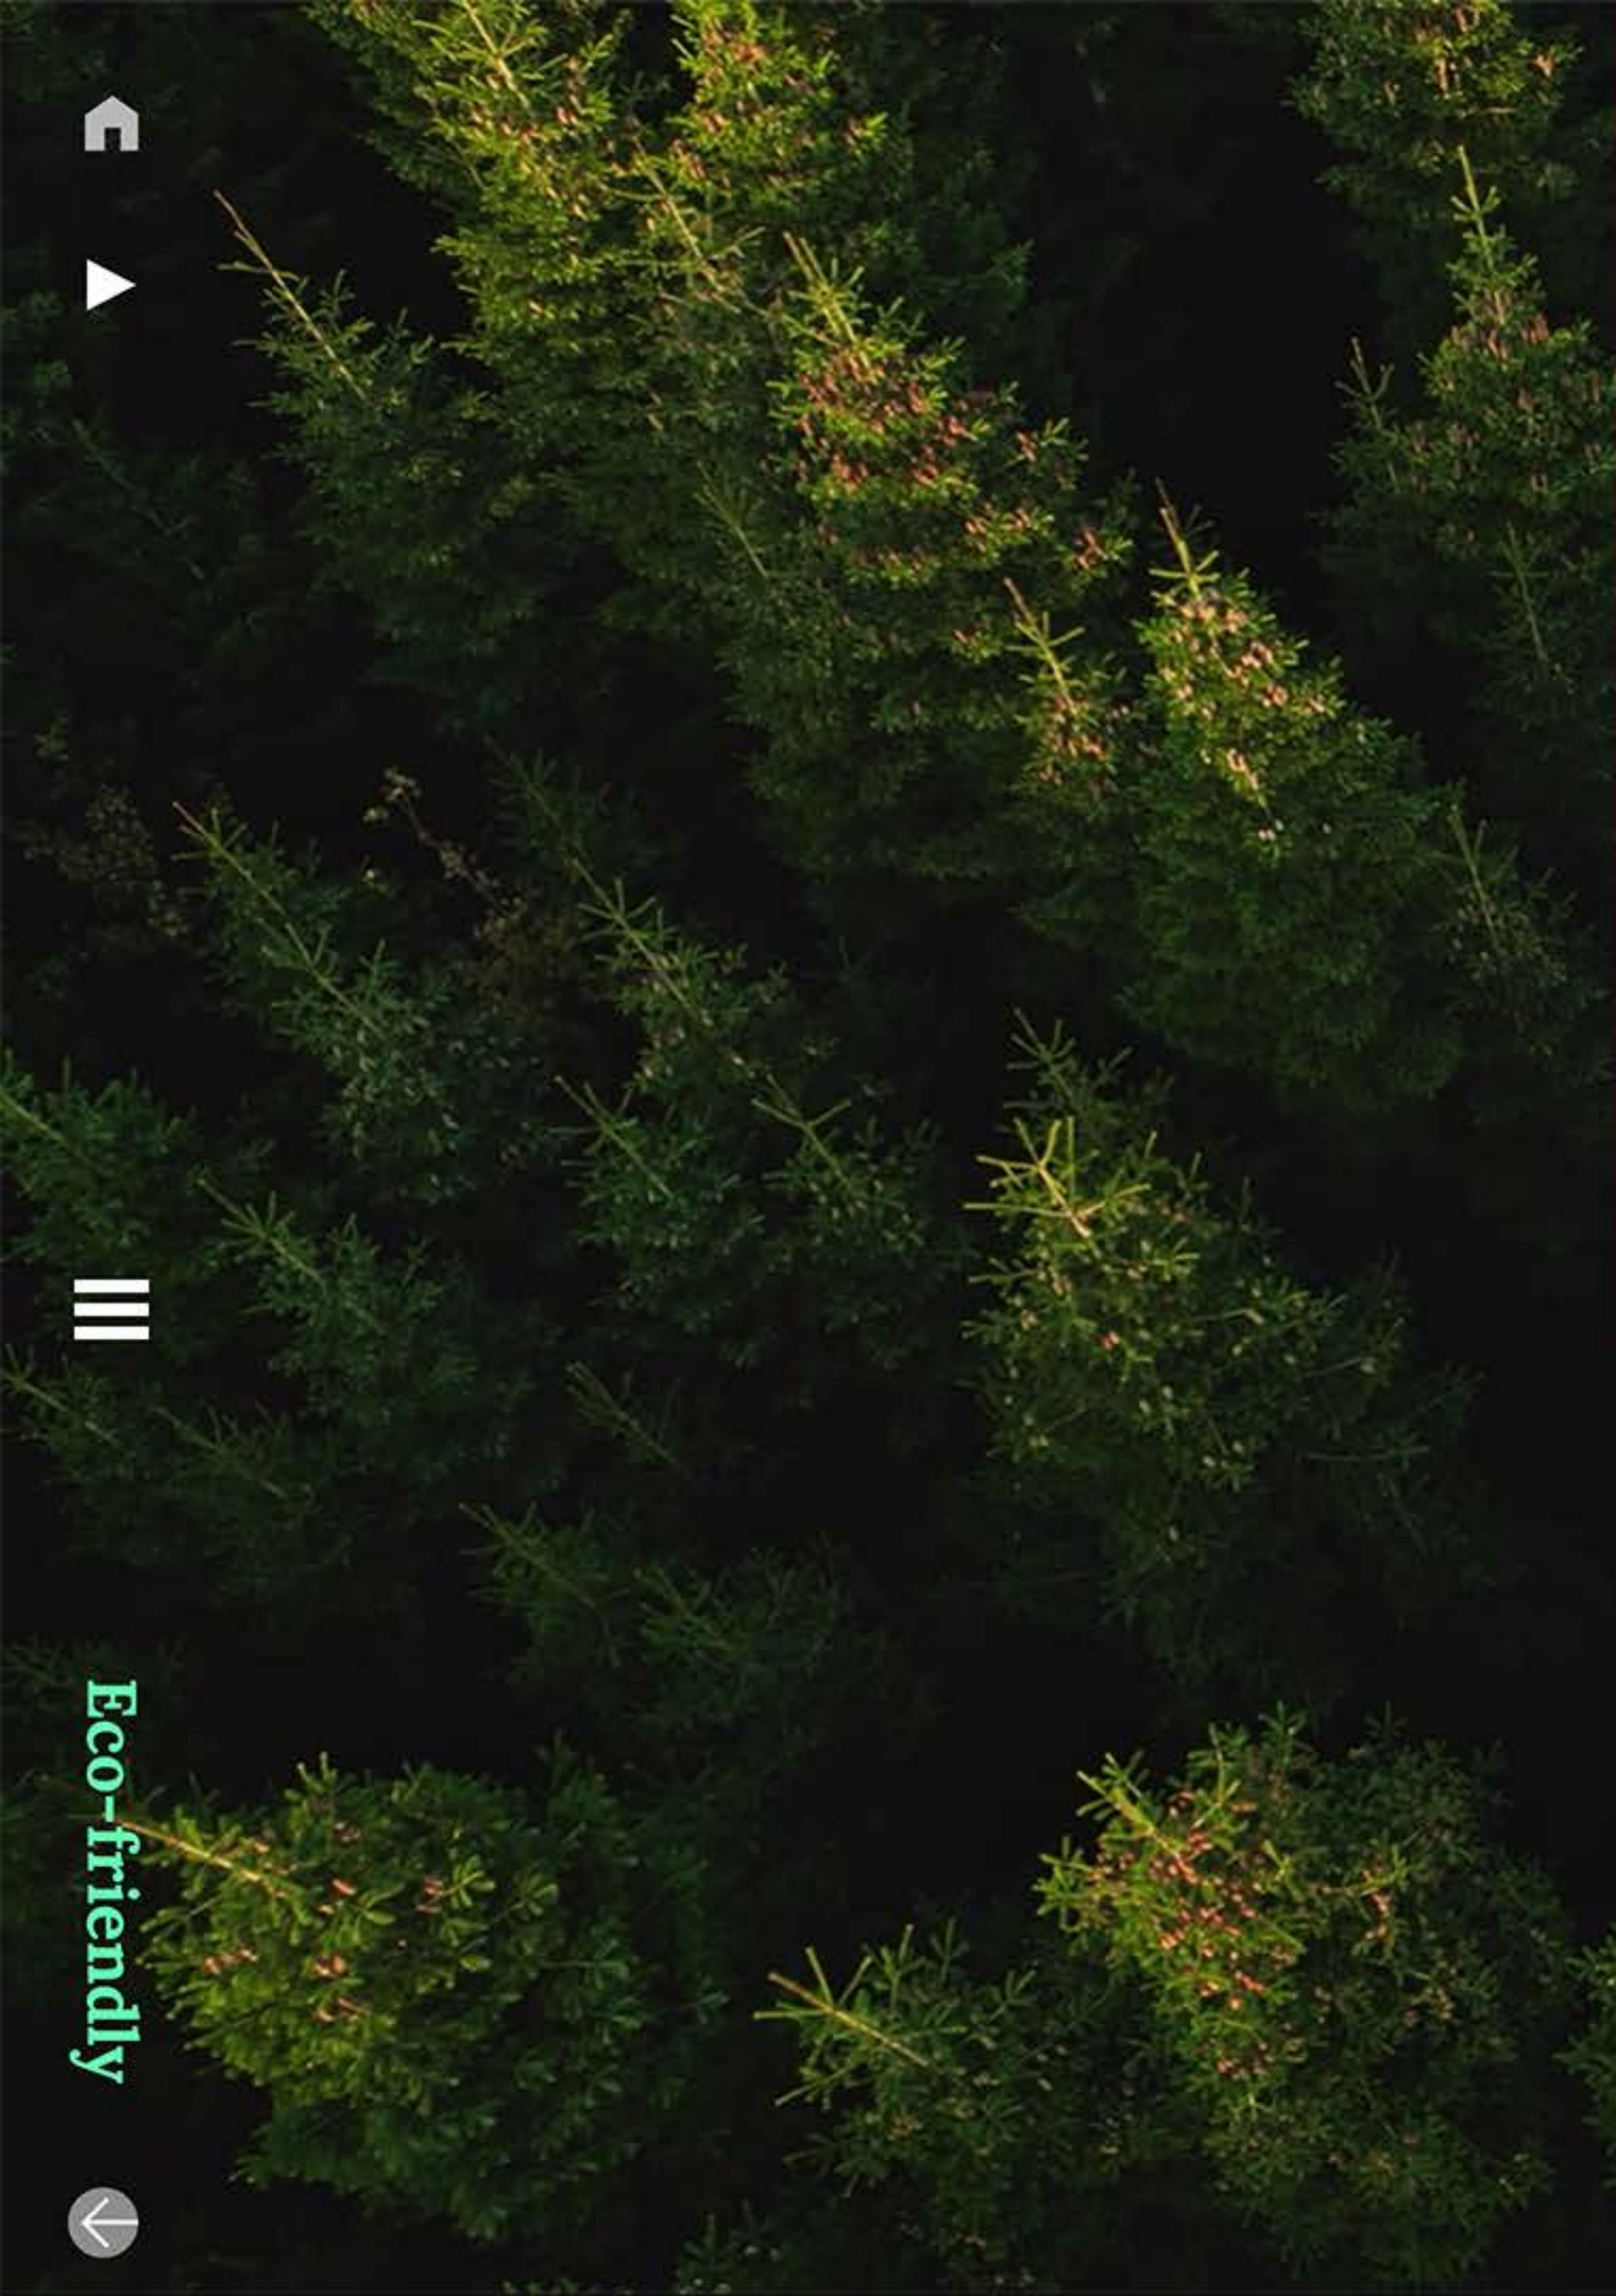

High-Quality Plastic Sheet Company

Jinyoung produces surface materials with a wide range of applications in furniture, appliances, semiconductors, cars, and construction. Jinyoung's sheet products lead markets around the world.

Eco-friendly

Care for the environment.
Inspiration from nature.

Eco-friendly

Jinyoung products are made from recycled plastic and better for the environment. Jinyoung is a socially conscious company that has embraced resource circularity.

Comfortable and
health-giving
spaces.

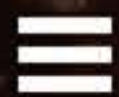

Tranquility is Life

Zero-biohazard solutions that
maintain their forms in
temperature changes achieve
spaces that are safe and
comfortable.

Tranquility is Life

Game Changer

Beautiful colors.
Stimulating
designs.

Game Changer

Jinyoung products come in colors and textures that let you achieve just the spaces and purposes you want.

Company

Make the world more beautiful,
Make life more convenient

Jinyoung is a manufacturer of plastic products used in the fields of furniture, appliances, semiconductors, cars, construction, and more.

Greeting

We combine our knowledge, technology, and breakthroughs to develop plastic solutions that improve quality of life and are needed across industries.

Through our 30 years in business, we have innovated and invested in making ourselves able to provide customers around the world with products of the highest standard. We are diversifying our business to allow our plastic products to find homes in a wider range of industries, including furniture, appliances, IT, and automotive.

Our pursuit of economic gains as a business is underpinned by environmentalism, transparent management, and social responsibility, the three pillars of ESG management. Jinyoung is unified in making effective decisions that produce ESG achievements that are sustainable. We are committed to providing customers with the utmost value while fulfilling our social responsibility. Through open and equal communication and mutual respect, everyone at Jinyoung does their part in creating the kind of company that we all want to work at.

Always dreaming bigger, we are breaking into new fields. By diversifying the downstream industries we supply, our business portfolio will expand and strengthen, allowing us to continue to contribute to a circular economy of plastic that society and the planet need.

Jinyoung is here as your dependable partner. Thank you.

Jinyoung products are of world-class value and quality, and are solutions that make the products that add value and convenience to life possible.

Overview

Commitment to R&D is how Jinyoung comes up with new solutions that find purpose in an array of industries.

Since our establishment in 1993, Jinyoung has consistently pushed against the norm to grow into the top Korean surface materials manufacturer we are today. Over some 30 years of effort, Jinyoung has broken new ground in the field of surface materials to become a provider of safe and stylish surface materials that go into making furniture, appliances, semiconductors, cars, and buildings. Growth and innovation as a business have endowed Jinyoung with market-leading technology, and the company is introducing new solutions in the fields of semiconductors, cars, and rechargeable batteries. Sustainability of and for the world is Jinyoung's mission.

Furniture surface finish developer that has grown to become a manufacturer of the plastic products used in a wide range of industries

Beginning(1993 - 2013)

- 1993 Jinyoung Plastic established
- 1996 Incorporated as Jinyoung Plastic
- 2000 Relocated to Daegok-dong, Seo District, Incheon
- 2003 Recognized as a venture company
- 2004 Certified as an INNO-BIZ company
- 2005 Renamed Jinyoung LDM

Growth(2014 - 2019)

- 2014 Patent for ASA resin-based furniture surface finish pending
Production and distribution of ASA resin-based deco sheet commenced
- 2016 Relocated to Geumgok-dong, Seo District, Incheon, for expansion
- 2018 Exports to China commenced
- 2019 Certified as a materials/parts/equipment expert
World Class Product recognition attained
Restructuring of company research center completed
Exports to India commenced

Progress(2019~)

- 2020 Recognized as a Global Strong SMB
- 2021 Awarded the 10 Million Dollar Export Tower
- 2022 Awarded the 20 Million Dollar Export Tower
Recognized as a Backbone Company
Renamed Jinyoung
Head office relocated to Seo District
Exports to Egypt and Portugal commenced
- 2023 Listed on the KOSDAQ market
Export to Turkey and Thailand commenced
Acrylux launched
Supply of semiconductor films commenced
Regenerated oil business commenced (Eco Energy Korea purchased)

EXCIMER COATING

ASA

PMMA

Product

EXCIMER COATING

Excimer-coated furniture surface finishes are an innovative method for keeping application surfaces clean and protected.

Excimer coatings strengthen application surfaces. With increased durability against wear and tear, furniture lasts much longer.

Excimer-coated furniture stands up better to the stress and contamination that occurs from everyday use.

Product

EXCIMER COATING

[Technology](#)[Process](#)[Special Features](#)

EXCIMER COATING

An excimer coating is hardened by excimer UV rays, which have a shorter wavelength than regular UV rays but with high energy.

- Furniture surfaces treated with an excimer coating stay resistant to scratches and contamination, while being soft, luxurious, silk-like to the touch.
- Choose an excimer-coated furniture surface finish as a practical solution to keep your furniture smudge-free and protected from food and other common sources of soiling.

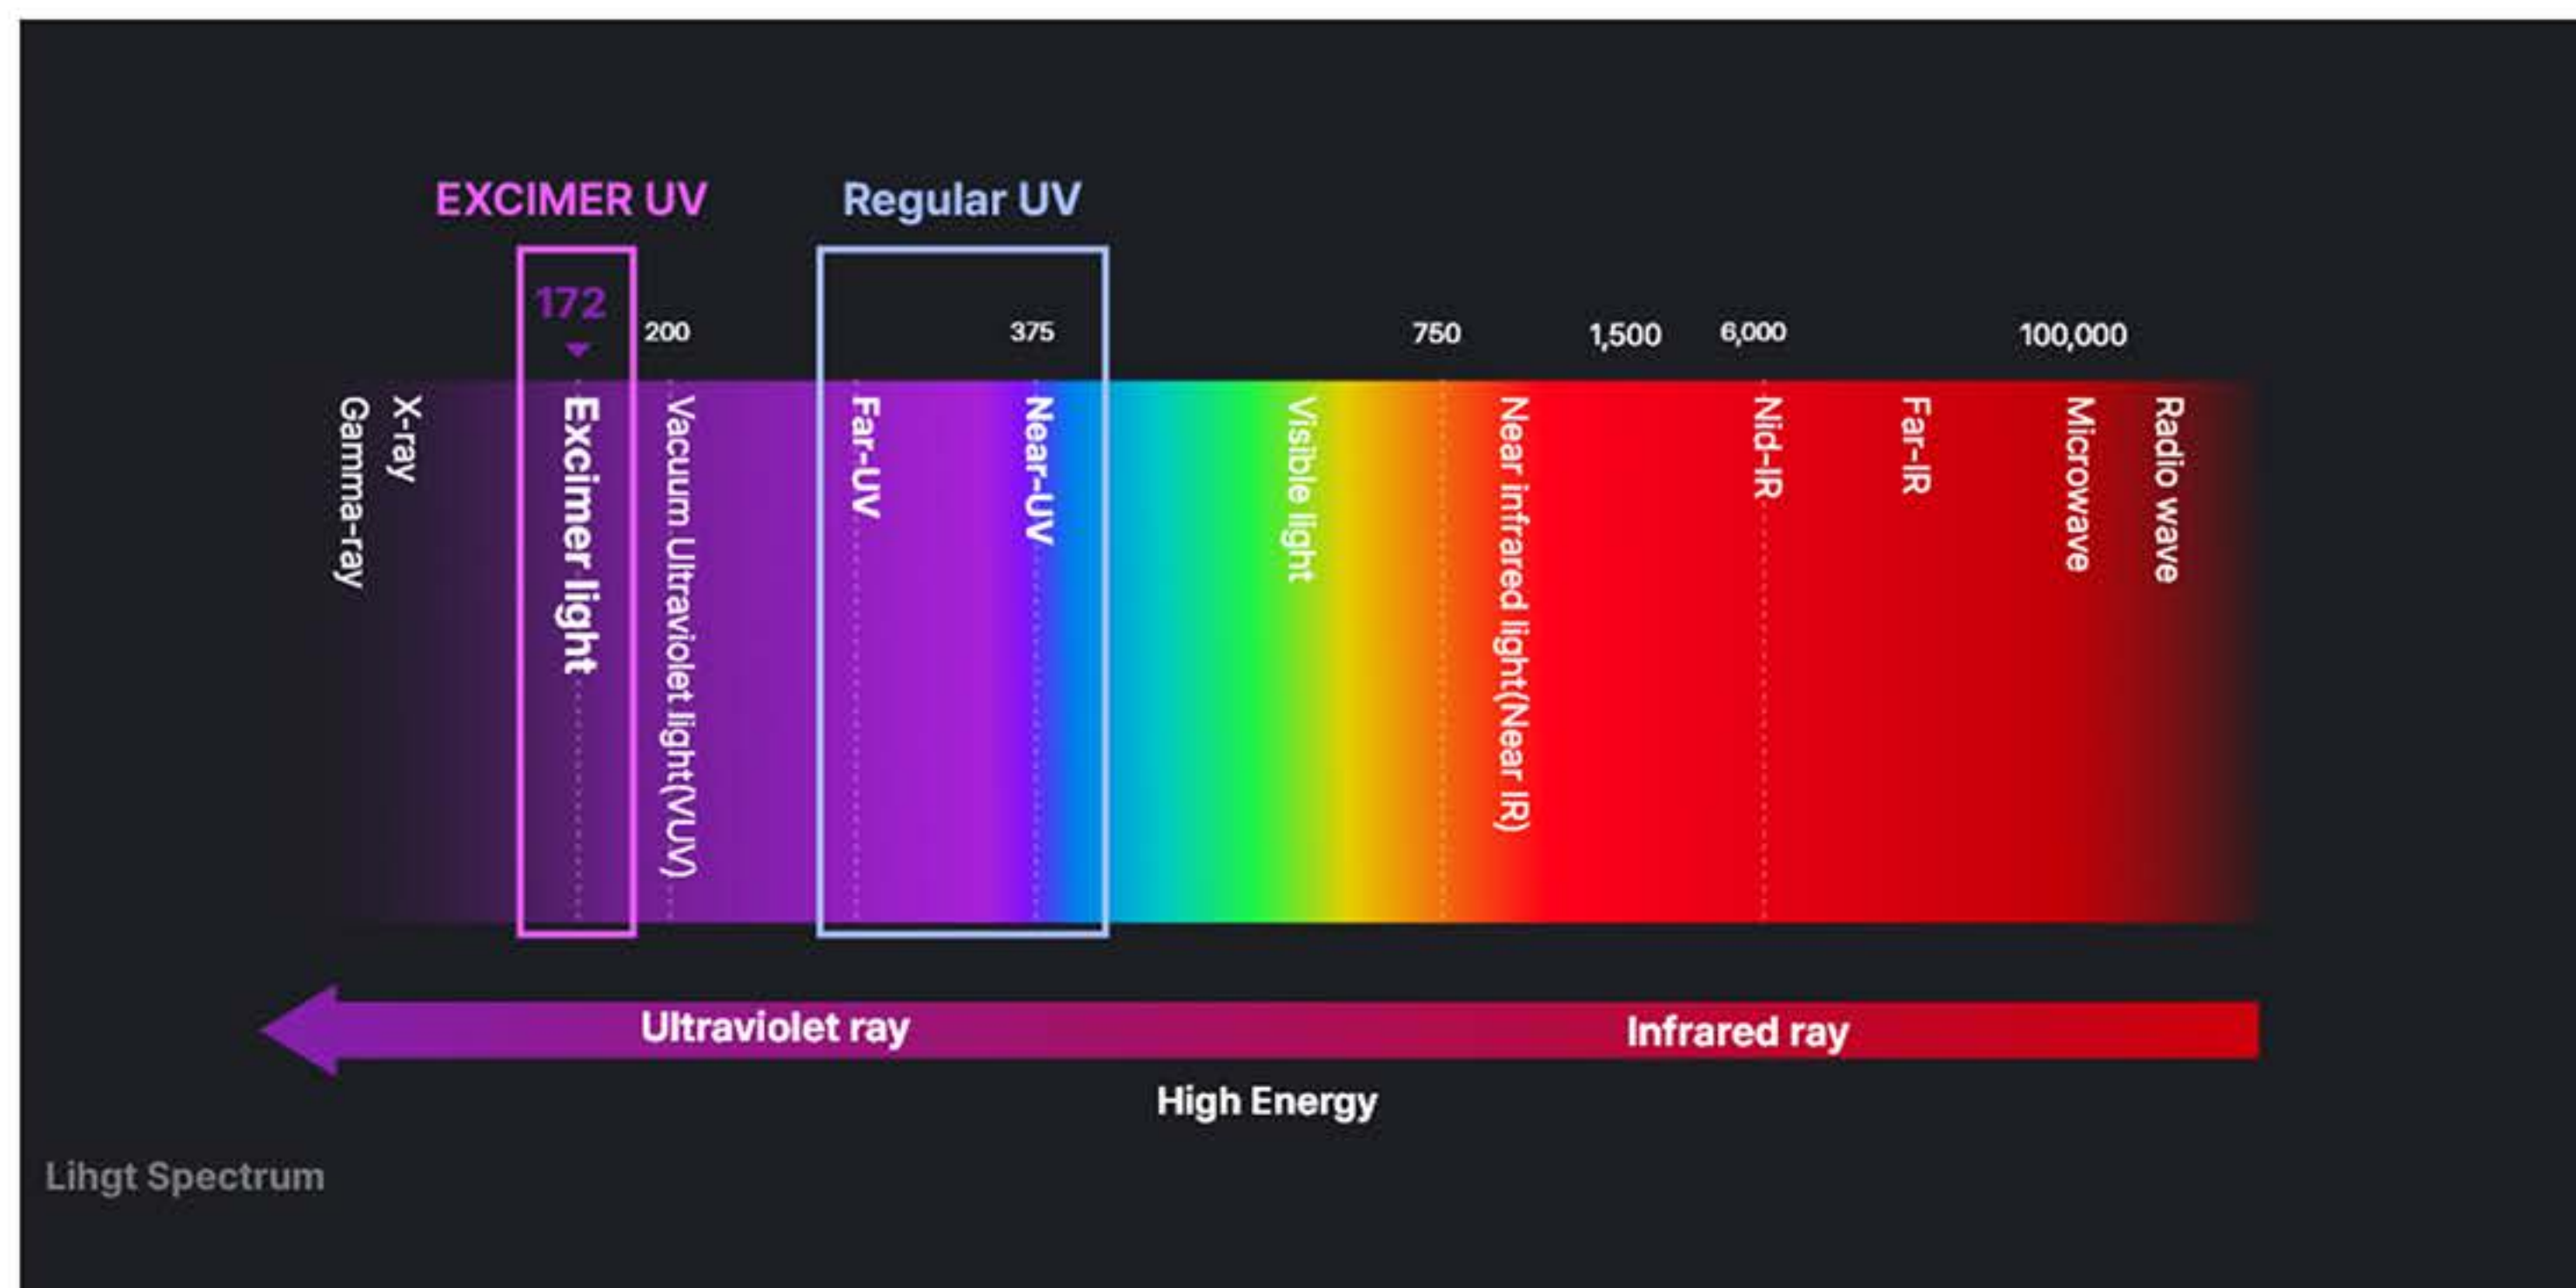

Smudge-free

Soling resistant

Scratch resistant

Product

EXCIMER COATING

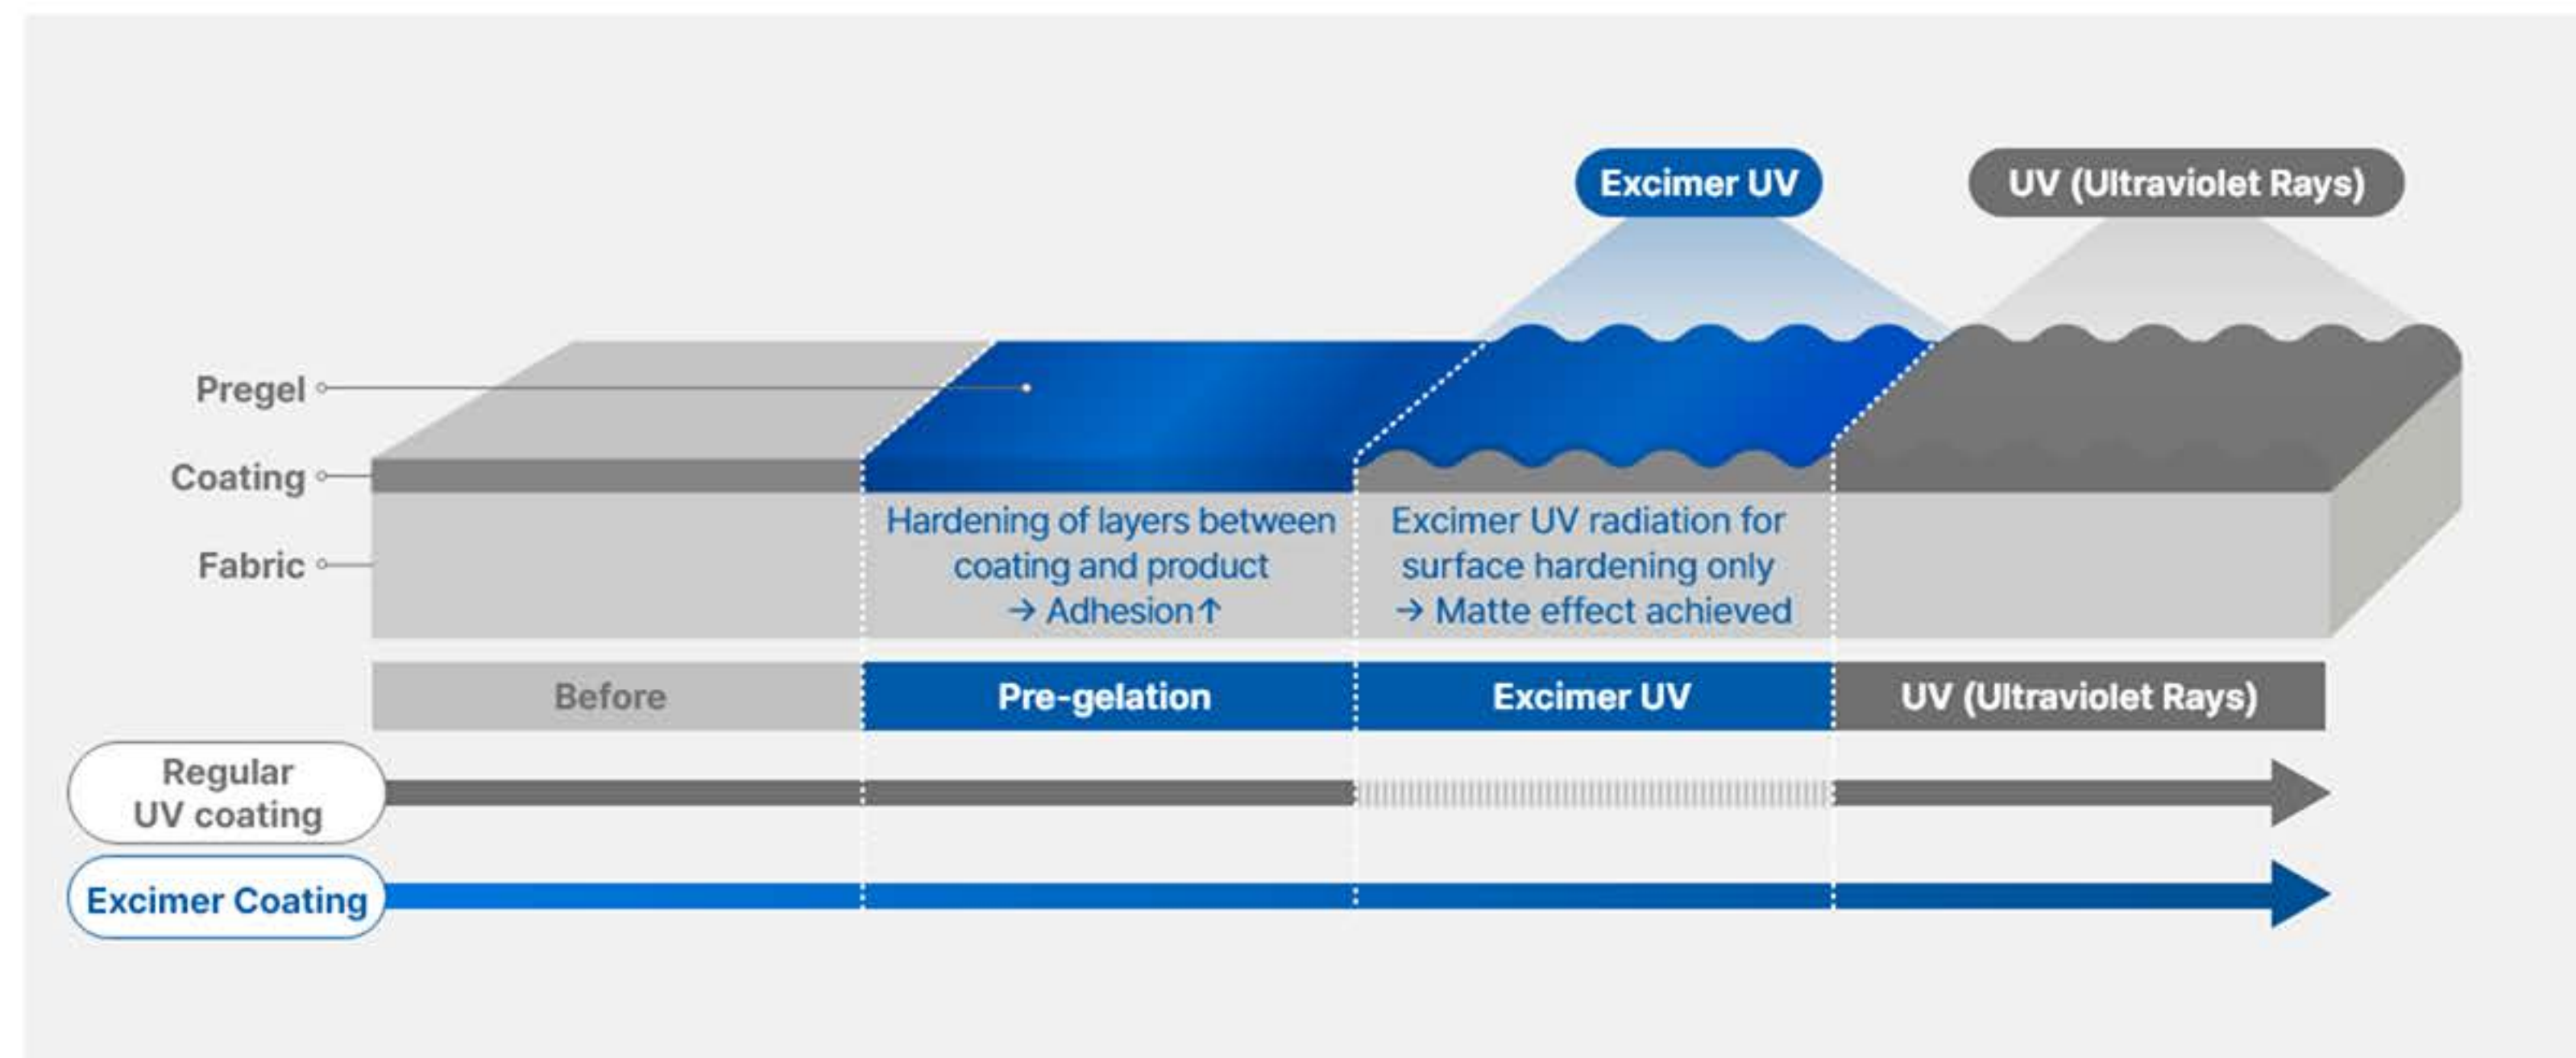

Technology

Process

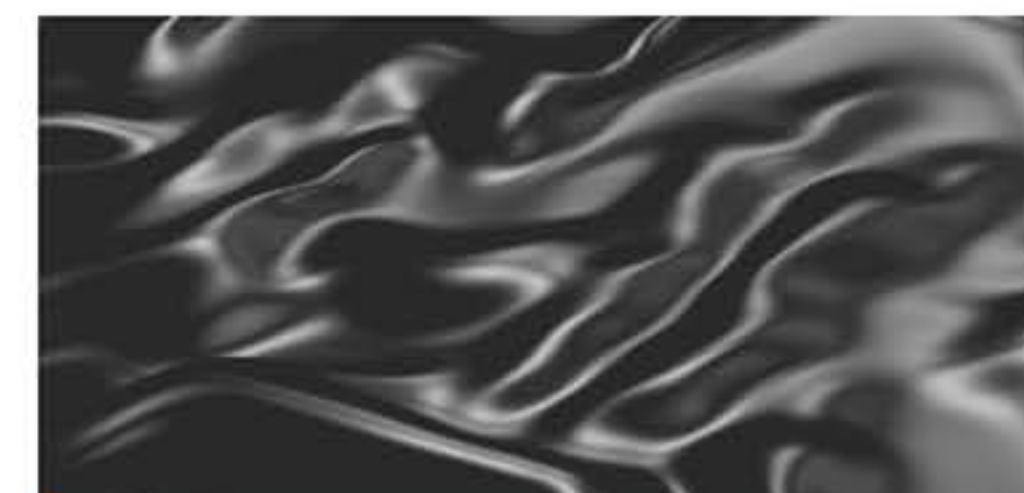

Special Features

Special surface coating technology

Excimer UV radiation has traditionally been used for surface cleaning of displays and semiconductor wafers through oxidization-removal of contaminants. Unlike regular UV radiation treatment, excimer UV radiation treatment only hardens the surface, rather than the entire treated coating.

ASA

ASA resin is an eco-friendly material valued for its weather resistance and ability to maintain its physical properties and external appearance. Jinyoung's ASA resin-based products have acquired the Korea Eco-Label certification through testing.

Product

ASA Material

[Product Benefits](#)[Eco-friendly](#)[Safety and quality](#)

Acrylate Styrene Acrylonitrile

ASA (Acrylate-Styrene-Acrylonitrile) resin is a copolymer of acrylic rubber and SAN. It can withstand extreme conditions. It is used for finishing products.

The ASA Deco Sheet is produced with ASA resin co-developed with LG Chem. It is supplied to kitchen furniture and construction companies in Korea. It is used for highly functional products like cars. It is weather-proof and has mechanical properties and an exterior that rarely warps.

UV Stability / Weather resistance

An eco-friendly solution containing minimal UV stabilizer. Offers high resistance to changes in physical properties and external appearance through exposure to the elements.

Chemical resistance

It is highly solvent-resistant. It can be applied to a variety of purposes.

High rigidity

Outstanding mechanical properties, including high rigidity and high impact resistance.

Processability

It can be used in various parts of processes, like pressing, injections, and calendaring.

ASA Resin-based Product Structure

ASA resin is a material used in the manufacturing of cars and other high-function products. It is an eco-friendly material valued for its weather resistance and ability to maintain its physical properties and external appearance.

(Unit: mm)

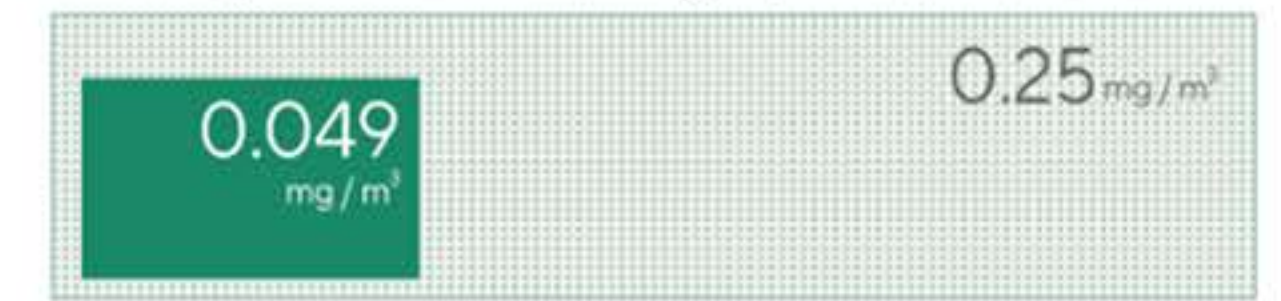

Thickness	Width	Purpose
0.30 ~ 0.50	1,340	Membrane
0.15 ~ 1.20	1,260	Overlay
0.15 ~ 0.30		Lapping

Certified Eco-friendly

- It does not generate formaldehyde (HCHO), plasticizer, heavy metal, or volatile organic compound.
- It has acquired an eco-friendly label and environment mark. It has passed large chamber tests.

Based on large chamber tests TVOC (0.25 mg / m³) : ASA application test result

UV Transmittance and Blocking

UV Transmittance

- PMMA products for outdoor application come with a trace of UV stabilizer for boosted weather resistance
- A UV stabilizer-free version is available for applications requiring UV transmittance, and provides high transmittance of UV rays and visible light.

Applications: UV lamp lenses, greenhouse lighting, insect trap lamps

UV Blocking

- PMMA is a transparent material that stays weather resistant under prolonged UV ray exposure.
- PMMA sheets are available in a UV-blocking version also, and are ideal for protecting the surface materials underneath their installation. Blocks UV rays by up to 380nm.

Applications: Retroreflective films, display covers (museums, art galleries)
